While these sweet peas are not as large as the Spencers, they are a distinctly new type as a photo on cover shows. They grow as tall as the Spencers, but foliage is somewhat heavier. Flowers measure as much as two inches across when well grown, with stems 14 to 16 inches long. Three to four flowers on a stem as a rule. Fragrance is much more pronounced than that of the Spencers. While not the best for commercial purposes, no collection is complete without this new distinct type. Colors in Rose Pink, Black-seeded and White-seeded White, Lavender, Lilac, Navy Blue and mixed colors.
